

THE GREAT AGENT HACKATHON

Everything You Need to Know

Dates	25th-26th September 2026
Venue	Freshworks Office, RMZ Ecoworld, Bengaluru
Map	Open venue in Google Maps
Format	Two-day, in-person hackathon. Participants leave at 8:00 PM on Day 1 and return at 8:00 AM on Day 2.

1. Tracks

Track	Focus
Track 1	Customer & Employee Experience Agents built on Freshworks Agent Studio, MCP, and multi-agent orchestration.
Track 2	Platform Agent Skills & Knowledge Reusable skills, MCP integrations, and the Freshworks developer platform.
Track 3	AI-native Enterprise (Open) Open canvas, any stack, greenfield agentic products.

2. Agenda

Day 1 - 25th September

Time	Activity
8:00 AM	Participant arrival, check-in, build-space allocation and briefing
9:00-10:00	Registration and breakfast
10:00-10:25	Welcome and opening - WIP India
10:30-11:00	Freshworks keynote
11:05-11:25	Anthropic keynote
11:30-12:10	Panel: The Future of Enterprise Agents
12:15-12:45	Freshworks Platform Showcase / Agentic Product Ideation
12:45 PM	Build begins
1:15-2:15	Lunch
2:15-3:35	Build
3:40-4:15	Mentor hours
4:20-6:00	Build + optional engagement activities
6:30-8:00	Final Day 1 build block
8:00 PM	Day 1 ends; participants leave

Day 2 - 26th September

Time	Activity
8:00 AM	Return and resume building
9:00-10:00	Breakfast + mentor check-in
10:00-10:45	Final build sprint and submission preparation
10:45 AM	Submission closes; builds frozen
10:45-12:05	Judging Round 1
12:05-12:20	Judge huddle and shortlisting
12:25-1:00	Next-stage teams announced
1:00-3:15	Judging / finalist evaluation and stage preparation

Time	Activity
3:40-4:00	Finalists move to main stage
4:00-4:30	The Great Agent Showcase - final round
4:30-5:00	Closing ceremony and winner announcements

3. Rules & Presentation Information

- **Freshworks integration is mandatory for Track 1 and Track 2.** Teams in these tracks must meaningfully build on or integrate with Freshworks products, including Freshdesk and/or Freshservice. Freshworks sandbox access will be provided.
- **Freshworks integration is not mandatory for Track 3 - AI-native Enterprise (Open).** Track 3 is an open canvas and teams may use any stack for their greenfield agentic product.
- **Wispr Flow is suggested for prompting.** Participants can use Wispr Flow to dictate prompts and work faster during the hackathon. [Download Wispr Flow using this link.](#)
- **This is not an overnight hackathon.** All participants must leave at 8:00 PM on Day 1 and return at 8:00 AM on Day 2.
- **You must build the same solution/idea that your team submitted on Devpost and that was selected for the finale.** Changing the idea is not allowed.
- **Judging will place majority weightage on what your team builds during the official hackathon timeline.** Teams should be prepared to demonstrate the work completed during the hackathon.
- **Final submission closes at 10:45 AM on Day 2.** Have your build, demo and submission links ready.

Information we are looking for in your presentation

- Initiative Overview
- Problem Statement
- Why Now (Rationale)
- Competitive Landscape
- Proposed Solution, MVP scope, Freshworks integration where applicable, and agentic/AI design
- Target Customers
- Value Proposition
- Pricing & Packaging
- Go-to-Market Plan
- Costs & Resources Needed
- Expected Benefits & Success Metrics
- Risks & Assumptions

The examples in the document are guidance only. Use the requested information to explain your own solution.

4. Prizes & Rewards

Cash Rewards

Award	Cash Prize
Overall Hackathon Winner	INR 40,000
Track 1 - Customer & Employee Experience	INR 20,000
Track 2 - Platform Agent Skills & Knowledge	INR 20,000
Track 3 - AI-native Enterprise (Open)	INR 20,000

Partner Prizes

Partner	Prize
Sarvam AI	• Best Use of Sarvam: 80,000 credits • Overall Winner: 30,000 credits
Anthropic	• Overall Winner team: USD 3,000 worth of credits • Each Track Winner team: USD 1,000 worth of credits
AWS	• USD 500 AWS credits for each of the four winning teams
Dodo Payments	• Overall Winner: 5,000 credits • Three Track Winners: 2,500 credits each
ElevenLabs	• Overall Winner: 3 months Pro per team member • Best Project Built with ElevenLabs: 3 months Scale per team member
Vobiz	• Vobiz track cash prize pool: INR 10,000 • Overall Winner: INR 25,000 credits • Best Project on Vobiz: INR 50,000 credits
Wispr Flow	Each member of the Overall Hackathon Winner team will receive 3 months of the Wispr Flow Pro plan for free.

Build Access & Credits

Partner	Build Access / Credits
Anthropic	\$100 Claude API credits per participant, valid for 7 days from grant.
Sarvam AI	500 API credits per team building with Sarvam.
Dodo Payments	500 credits for teams.
AWS	Participants can use the AWS Free Tier during the hackathon.
ElevenLabs	1 month free Creator Tier for all participants (131K credits).
Vobiz	INR 5,000 in build credits for number purchase, voice APIs, call minutes, etc.
Wispr Flow	One month of Wispr Flow access for participants. Wispr Flow is suggested for prompting.
Freshworks	Sandbox access will be provided. Freshworks integration is mandatory for Track 1 and Track 2, but not mandatory for Track 3.

5. Know Your Partners

Freshworks

Freshworks builds AI-powered software for customer support, IT service management, employee service and business workflows. For this hackathon, Freshworks integration through products such as Freshdesk and Freshservice is mandatory for Track 1 and Track 2. It is not mandatory for Track 3.

[Visit Freshworks](#)

Anthropic

Anthropic develops Claude, a family of AI models and developer tools for building intelligent applications and agents. Participants can use sponsored Claude API credits with Claude Code, Claude Agent SDK and the Claude Developer Platform.

[Visit Anthropic](#)

Sarvam AI

Sarvam AI builds India-focused generative AI infrastructure, including language, speech and voice capabilities designed for Indian use cases. Teams can use Sarvam APIs to add multilingual, conversational and voice-first experiences to their agents.

[Visit Sarvam AI](#)

Dodo Payments

Dodo Payments provides payments infrastructure for software and digital businesses, helping products accept and manage payments. Teams building monetization, checkout or payment workflows can explore Dodo Payments as part of their solution.

[Visit Dodo Payments](#)

AWS

Amazon Web Services is a cloud platform offering compute, storage, databases, AI services and infrastructure for deploying applications at scale. Participants may use the AWS Free Tier during the build, while winning teams are eligible for sponsored AWS credits.

[Visit AWS](#)

ElevenLabs

ElevenLabs provides AI audio technology for text-to-speech, conversational voice and voice-enabled applications. Teams can use it to add natural speech and audio experiences to their agents, with sponsored Creator access available to participants.

[Visit ElevenLabs](#)

Vobiz

Vobiz provides programmable telephony infrastructure for voice applications, including phone numbers, voice APIs and calling capabilities. Teams can use sponsored build credits to create agents that make or receive calls and support real-world voice workflows.

[Visit Vobiz](#)

Wispr Flow

Wispr Flow is an AI voice-to-text tool that turns natural speech into polished written text across apps and websites. It can help participants dictate prompts, notes and messages quickly during the build, and is suggested as a prompting tool for the hackathon.

[Download Wispr Flow](#)

6. Quick Checklist

- Set up Wispr Flow if you would like to use voice prompting during the hackathon.
- Track 1 and Track 2 teams: plan and verify your Freshworks integration using Freshdesk and/or Freshservice.
- Track 3 teams: Freshworks integration is optional.
- Continue with the same Devpost-shortlisted idea; do not change the project idea.
- Review TGAH - Presentation Details.docx and prepare your business case.
- Test your demo flow and keep backup links/assets ready.
- Bring your laptop, charger and required adapters.
- Be at the venue on time on both days.
